

Electronic Volume Measuring Equipment
Guy Dickes
Baltimore, MD 410-484-0672
Application 10/614,173

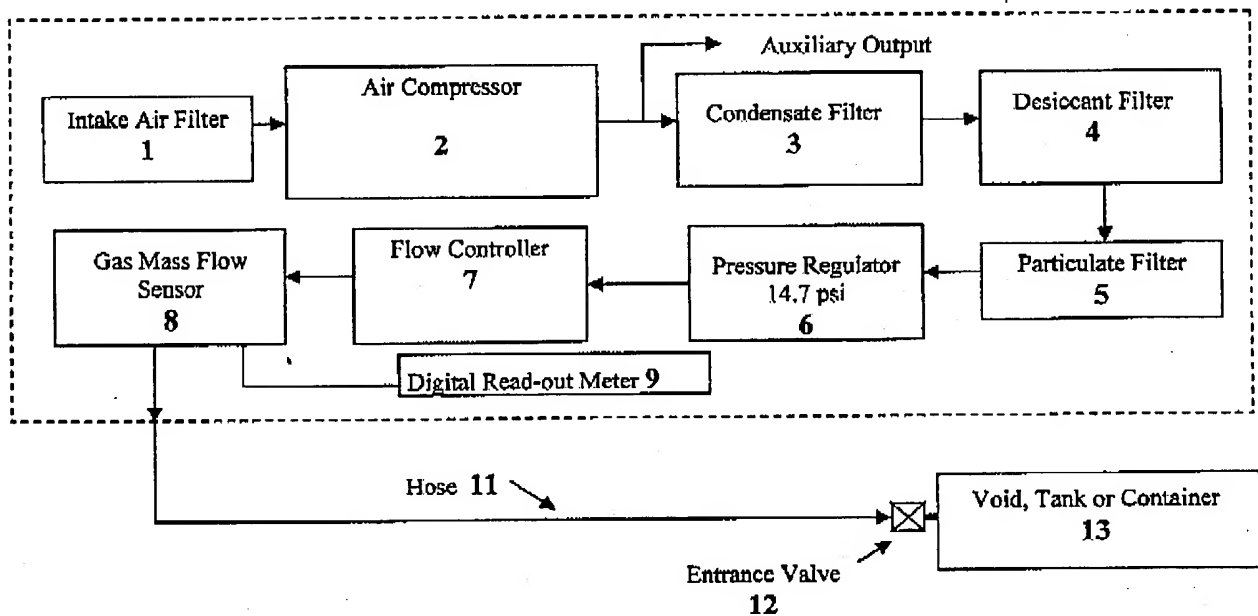

Drawing #1 Basic Equipment Layout and Usage (Pressure)

Values shown are for representation purposes only

Electronic Volume Measuring Equipment
Guy Dickes
Baltimore, MD 410-484-0672
Application 10/614,173

Drawing #2 Process One: Specific Internal Component Layout
Pressure Version- Compressor

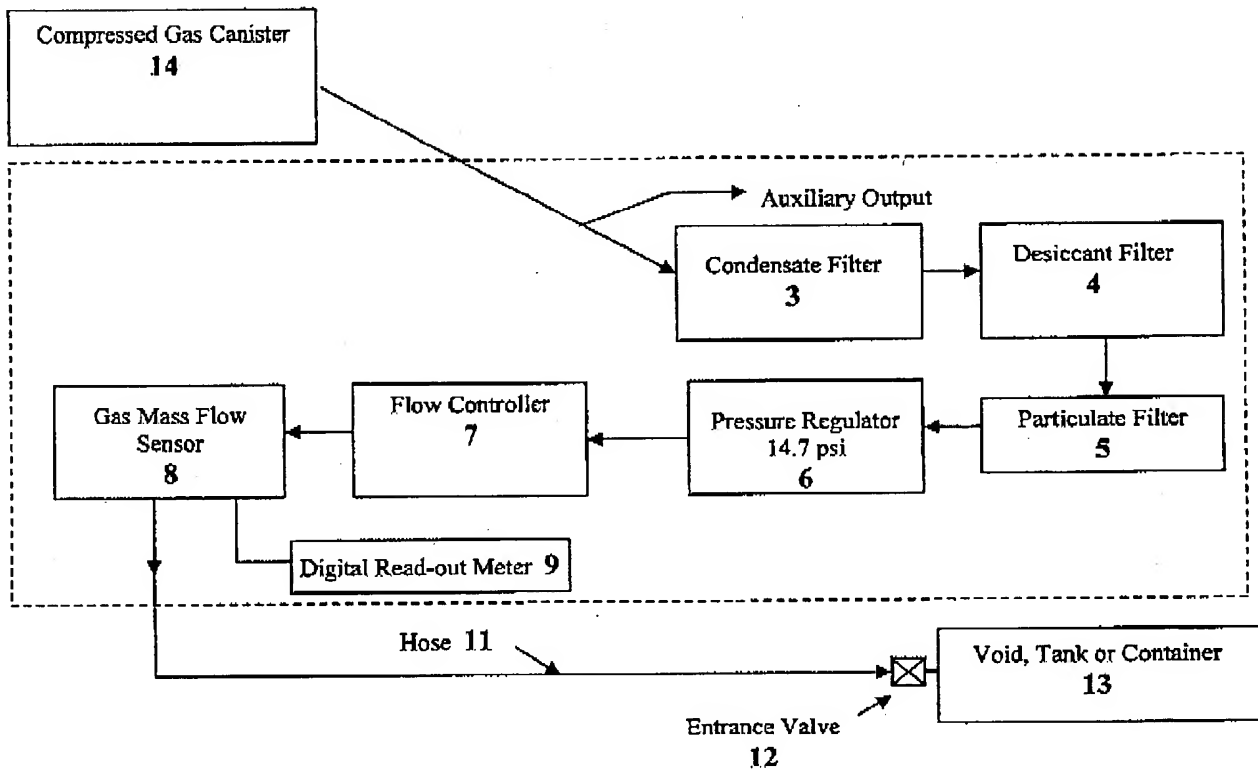

Note:

Auxiliary Output is used for leak detection

Electronic Volume Measuring Equipment
Guy Dickes
Baltimore, MD 410-484-0672
Application 10/614,173

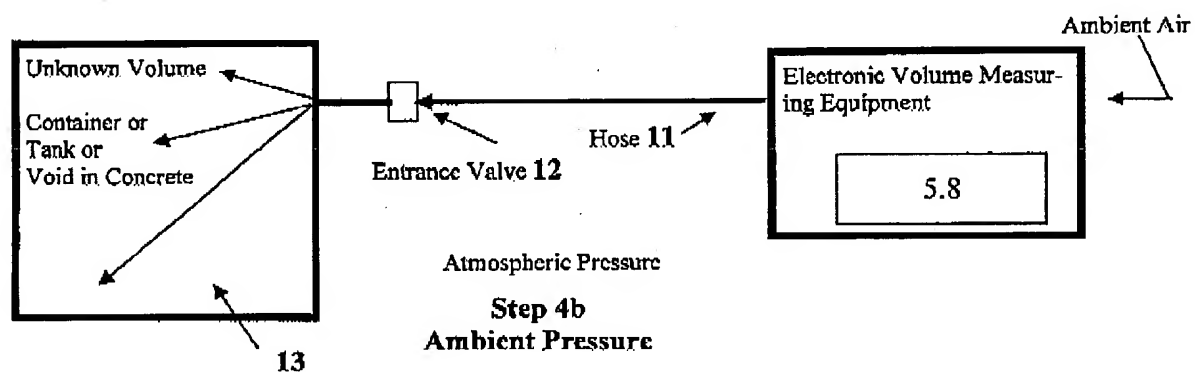

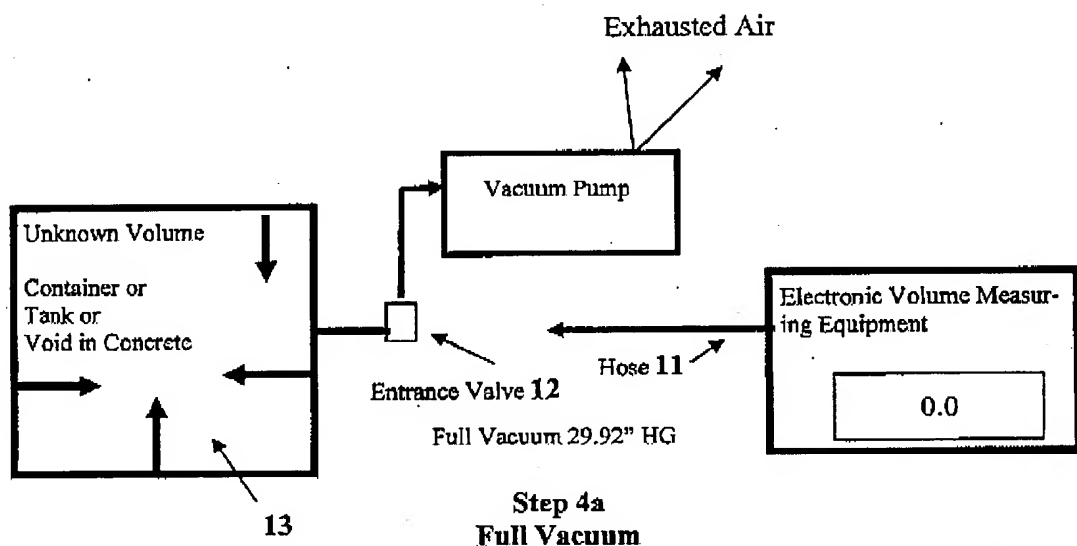

Drawing #3 Process One: Specific Internal Component Layout
Pressure Version

Note:
Auxiliary Output is used for leak detection

Electronic Volume Measuring Equipment
 Guy Dickes
 Baltimore, MD 410-484-0672
 Application 10/614,173

Drawing #4 Process Two: Basic Equipment Layout and Usage
 Air Rushing Through Device into Evacuated Void or Container

Values shown are for representation purposes only

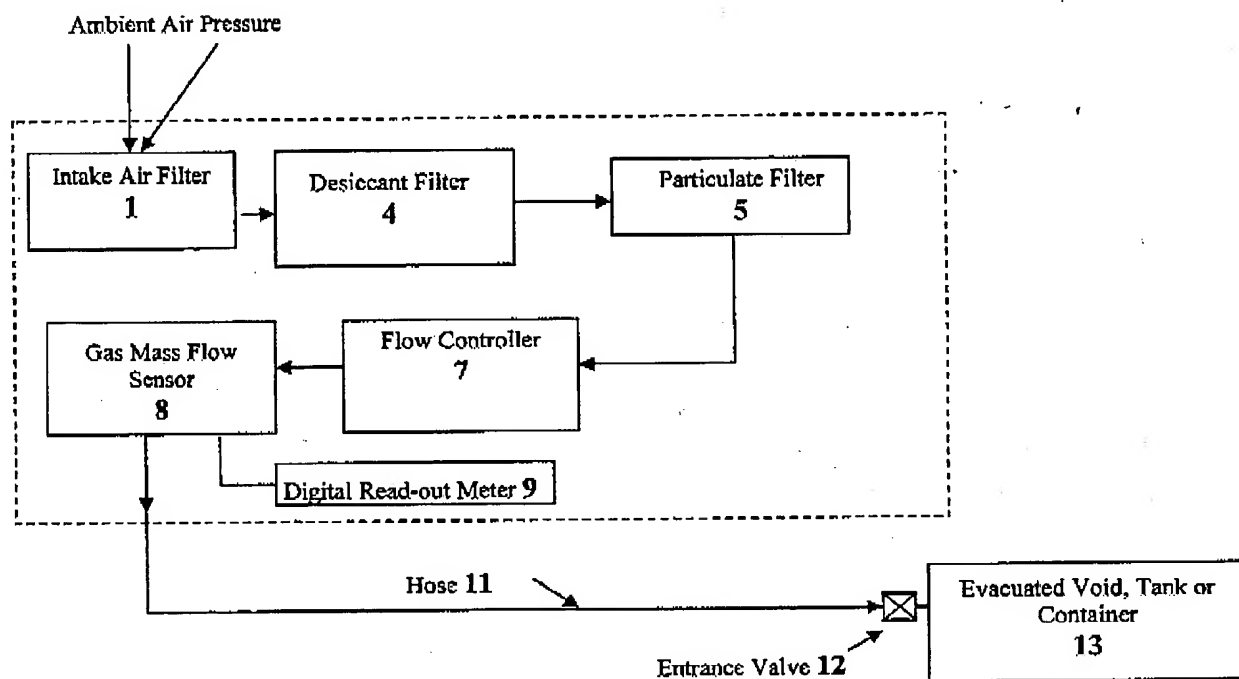

Electronic Volume Measuring Equipment

Guy Dickes

Baltimore, MD 410-484-0672

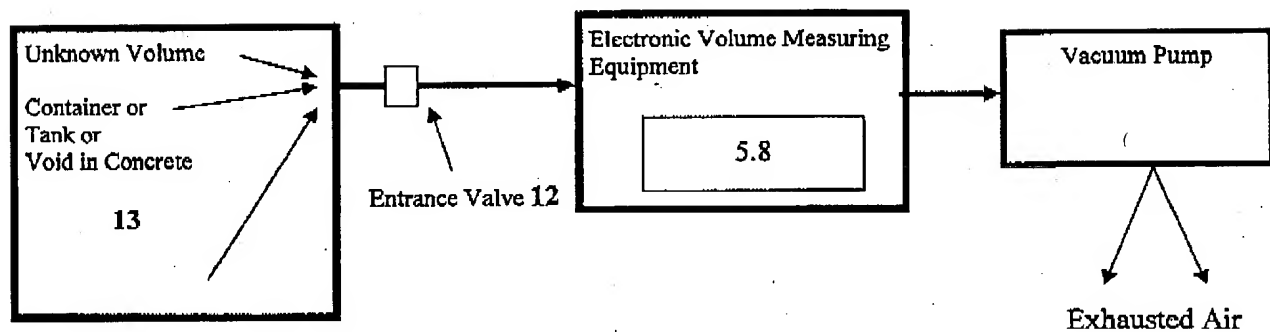

Application 10/614,173

Drawing #5 Process Two: Specific Internal Component Layout
Air Rushing through Device into Evacuated Void or Container

Electronic Volume Measuring Equipment
Guy Dickes
Baltimore, MD 410-484-0672
Application 10/614,173

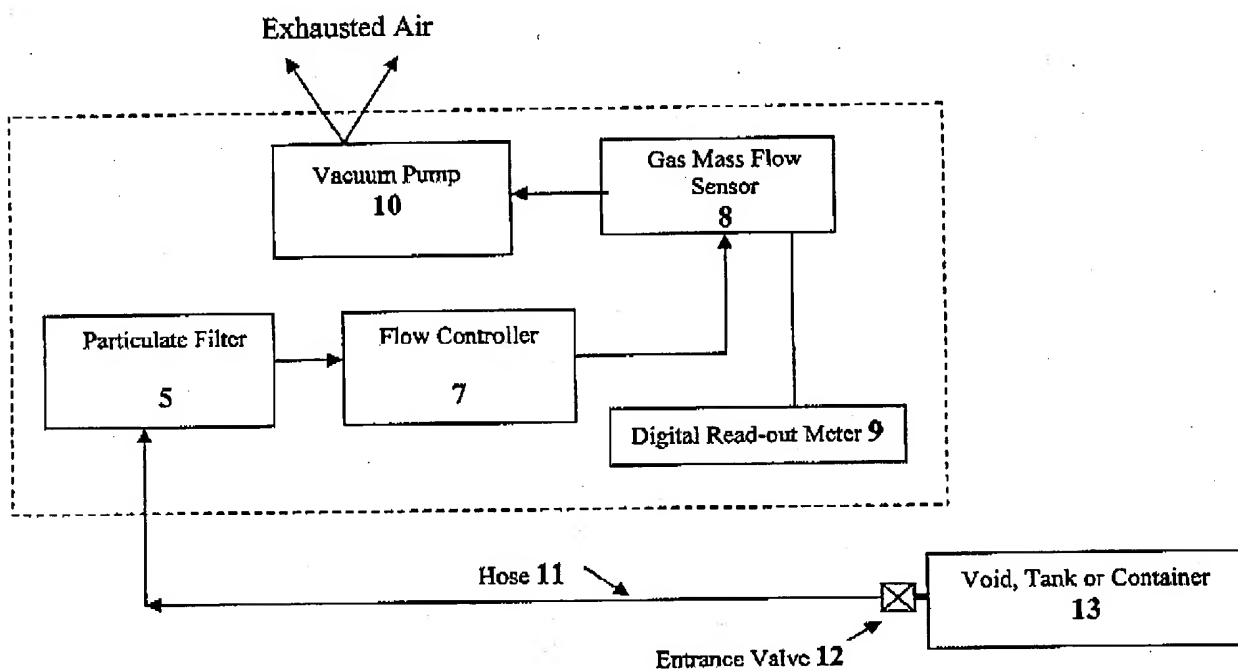

Drawing #6 Process Three: Basic Equipment Layout and Usage
Vacuum Drawn Through the Device

Values shown are for representation purposes only

Electronic Volume Measuring Equipment
Guy Dickes
Baltimore, MD 410-484-0672
Application 10/614,173

Drawing #7 Process Three: Specific Internal Component Layout
Vacuum Drawn Through the Device

Electronic Volume Measuring Equipment

Guy Dickes

Baltimore, MD 410-484-0672

Application 10/614,173

Drawing #5 Process Two: Specific Internal Component Layout
Air Rushing through Device into Evacuated Void or Container
